EDUCATION

University of Illinois at Urbana-Champaign

Expected: May 2027

Bachelor of Science in Computer Science

Cumulative GPA: 4.0/4.0

- Honors: [Provost Scholarship \(Full-tuition Scholarship\)](#); [UIUC Research Park Most Outstanding Intern Award \(1 of 800 selected\)](#); [Engineering Visionary Scholarship 2025/2026/2027](#); [James Scholar](#); [Dean's List 2024/2025](#)
- Relevant Coursework: Distributed Systems, Cloud Computing, Systems Programming, Database Systems, Deep Learning, Computer Vision, Data Structures and Algorithms, Computer Architecture, C++, Java

PROFESSIONAL EXPERIENCE

Software Engineering Intern (Incoming), Adobe

May 2026 – Aug 2026

- Joining the GenStudio for Performance Marketing team, building agentic AI-powered marketing automation tools

Software Engineering Intern, PrairieLearn, Inc.

Aug 2025 – Present

- Achieved **99%+** AI grading accuracy across 10k+ student submissions; co-authored AIED 2026 paper on results
- Architected cloud-based infrastructure for AI inference and evaluations with Google, OpenAI, and Anthropic APIs
- Designed and developed **end-to-end** user experience and APIs for grading, Stripe payments, and interpretability
- Engineered **distributed, durable** workflow engine for orchestrating multi-agent rubric editing & grading systems
- Deployed AI product features to **180,000** students at major universities including **UIUC**, **Berkeley**, and **UBC**

Software Developer, Google Summer of Code – Emory University

Jun 2025 – Feb 2026

- Engineered [ML pipeline](#) to train and optimize automated MRI segmentation models with OpenCV and PyTorch
- Expanded limited proprietary training data by **1,600%** via custom-trained, state-of-the-art generative AI models
- Improved segmentation accuracy from **39%** to **80%**. Collaborated with Google and Emory University researchers

Software Engineering Intern, PrairieLearn, Inc.

Dec 2024 – Aug 2025

- Engineered [image-capture API](#) delivering **1ms** captures for **180,000** students in high-stakes exams & assessments
- Redesigned [staff navigation user experience](#) across **80+** pages, enhancing experience for over **2,000** courses
- Implemented UIs and API endpoints with JavaScript, React, HTML, CSS, WebSockets, PostgreSQL, and Python

Software Engineering Intern, PATHWAYos

Jun 2023 – Aug 2023

- Created work-based learning experience matching system for **500,000**-student platform with React & TypeScript
- Built low-latency Swift/MySQL API for opportunity matching via preferences, location, experience, & availability
- Iterated features based on feedback and peer reviews from engineering and product teams with GitHub and Slack

Software Developer, Normandy Remodeling

Aug 2022 – Jan 2025

- Architected [cloud-based platform](#) managing logistical and financial data on **33,000** customers and **9,900** projects
- Built frontend with React, CSS, and TypeScript, and backend with Node.js, Express, MongoDB, Jest, and Azure
- Automated document, email, and invoicing workflows for **100 employees** via Azure & OneDrive/Office 365 APIs

RESEARCH EXPERIENCE

Undergraduate Researcher, University of Illinois Urbana-Champaign

Oct 2024 – May 2025

- Developed [AI model](#) to inject imperceptible noise into audio, disrupting malicious audio deepfake attacks
- Implemented GPU-accelerated PyTorch pipeline for training and optimizing the model on **1,000+** speakers
- Collaborated with UIUC, Google, and Meta AI researchers to develop the audio defense technologies

LEADERSHIP AND ACTIVITIES

Web Team Lead, HackIllinois

Jul 2025 – Mar 2026

- Led redesign of [site](#), [registration](#), and [admin web systems](#) for UIUC's **1,000+** attendee flagship hackathon
- Revamped admin site, implementing features to streamline applicant, event, and sponsor data management
- Collaborated with designers, operations leads, and engineering teammates to iterate on systems developed

TECHNICAL SKILLS

Languages: C++, C, Go, TypeScript, JavaScript, Python, SQL, Swift, Java, HTML, CSS

Web and Backend: React, Next.js, Node.js, Express, REST, WebSockets, MongoDB, MySQL, PostgreSQL, Redis

Data Science and AI: PyTorch, OpenCV, Google Gemini, OpenAI, NumPy, Pandas, Matplotlib, spaCy NLP, NLTK

Other: Git, GitHub, CI/CD, GitHub Actions, AWS, EC2, S3, Google Cloud, Azure, Linux, SwiftUI, Flutter
